INDUSTRIAL LOCATION DETERMINANTS

1971-1975

A statistical summary of manufacturing firms' locational preferences for 1971-1975, as reported in a special survey conducted by the U.S. Bureau of the Census for the Economic Development Administration, U.S. Department of Commerce.

Prepared under the direction of Joseph G. Hamrick, Deputy Assistant Secretary for Economic Development Planning

February 1973

U.S. DEPARTMENT OF COMMERCE

Frederick B. Dent, Secretary

William W. Blunt, Jr.

Acting Assistant Secretary for Economic Development

FOREWORD

This publication, "Survey of Industrial Location Determinants, 1971-1975," is part of a continuing effort designed to assist EDA eligible areas to achieve more success in their efforts to secure a broader industrial base capable of providing additional employment opportunities. The success of local area efforts to attain more balanced economic and population growth frequently depends on the ability to identify and attract those industries with locational requirements compatible with the area's resources. Knowledge of industry location determinants is essential to guide area planners in a more rational search for specific industries and to plan for industrial development. Therefore, the industrial location determinants reported by firms producing the product classes contained in this report should assist in identifying the nature and relative importance of factors which influence industrial location decisions.

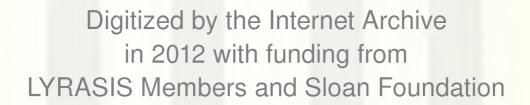

The cooperation of the thousands of manufacturing companies who voluntarily completed questionnaires is gratefully appreciated.

William W. 1 Slunds N.

William W. Blunt, Jr.

Acting Assistant Secretary

for Economic Development

Introduction

The Economic Development Administration (EDA) of the U. S. Department of Commerce, established under the Public Works and Economic Development Act of 1965, has a legislative mandate to assist the nation's underdeveloped and declining areas in the development of their economic resources and potentials. One effort undertaken by EDA to carry out this mandate has been the development of an Industrial Location Planning System. This system is designed to match resources of those areas eligible for EDA aid with perceived industrial locational requirements. As part of this effort, EDA contracted with the U. S. Bureau of the Census to survey leading manufacturing firms in a selected number of growth industries. (See Table I) The survey was conducted during the later half of 1971.

This publication, the first of a series to be issued as an aid to local and State industrial development planners and public officials, contains summary tabulations of responses by business firms, as reported on Form ED-707B, Survey of Industrial Location Determinants 1971-1975. (See Appendix A) Responses reported on Form ED-707A, Survey of Manufacturing Plant Characteristics (see Appendix B) are being processed for tabulation and publication. It is hoped that these survey responses will provide information useful for decision-making on industrial development issues such as the compatibility of specific industry needs with the resources of particular communities, the development of public facilities and services, zoning ordinances, tax incentives, etc.

<u>Selection of Manufacturing Industries and Plants for Mail</u> Survey

Manufacturing industries which had demonstrated reasonable growth between 1958 and 1967, or which appeared to have good growth prospects in 1970, were identified and selected for inclusion in the survey. These industries were identified by their Standard Industrial Classification (SIC) and the Bureau of the Census 5-digit product class code number. Within these classifications plants which (1) were primarily engaged in the production of the growth product classes (represented by 50% or more of the total value of shipments of the plant) and (2) had 100 or more employees were included. It should be noted that manufacturing activities which are not eligible to receive assistance from EDA to locate in designated depressed areas (e.g., apparel manufacturing, etc.) were excluded from the scope of this survey.

The mailing panel consisted of selected individual manufacturing establishments in 254 product classes taken from the 1967 Census of Manufactures name and address file. This list was then matched against the 1970 Annual Survey of Manufactures to update plant identification records for such items as name, address, etc.

The panel selection, mail canvass, and processing of returns were conducted by the Bureau of the Census as collecting and compiling agent for EDA.

Coverage of Survey

A total of 2,950 companies in 254 product classes was selected as the mailing panel for this survey. They received 5,500 Form ED-707A's and 3,800 Form ED-707B's. Of these, 66 percent and 70 percent respectively were filed and are included in the tabulations.

Although there were 2,656 ED-707B reports filed, respondents occasionally omitted responses to one or more of the specific inquiries on the form. No follow-up attempt was made to secure a 100 percent response rate to all inquiries; unanswered items were tabulated as "no response."

Reports filed in the survey do not provide data by which to estimate the proportion of the total product class output (by all establishments) represented by the reporting plants. In the absence of reliable coverage estimates and because the survey respondents typically included the larger companies, it was decided to publish the results for all product classes which cleared the Bureau of the Census disclosure tests. However, the reader should note the number of companies reporting in the product class when evaluating the survey results as representative of locational preferences.

Report Forms

Industrial plants currently in operation generally reflect locational decisions made during previous decades. Analyses of the site, locational and plant characteristics confined exclusively to these existing units might therefore be inadequate to identify locational requirements currently considered in decisions to expand or construct new facilities. In order to distinguish between these historic and current locational requirements, two report forms were developed for this survey.

To identify the locational and operating characteristics of plants in operation in 1970, individual plant reports were requested on Form ED-707A: Survey of Manufacturing Plant Characteristics, (see Appendix B). The industrial location needs of companies contemplating expansion or construction of new facilities during 1971-1975 were to be reported on Form ED-707B: Survey of Industrial Location Determinants, (see Appendix A). Therefore, each company selected for reporting individual plant operations on Form ED-707A was also requested to file one Form ED-707B for each product class in which one or more facilities were operated. To illustrate, assume that four plants of Company A were selected to file 707A reports in the survey; the table below indicates the number of 707B forms that would be mailed to Company A.

<u>Plants</u>	Product Class	707A Reports	707B Reports
Plant l	24323 Softwood plywood	1)	1
Plant 2	24323 Softwood plywood	1)	T
Plant 3	24326 Softwood veneer	1	1
Plant 4	24324 Nonwood-face plywood	<u>1</u>	<u>1</u>
	Total	4	3

Product Classes

Each plant filing in the 1967 Census of Manufactures is classified in one of the more than 400 4-digit industry code classifications in accordance with the Standard Industrial Classification Manual (SIC) prepared by the Office of Management and Budget. The individual products for which data are collected in the Census of Manufactures are assigned 7-digit product codes; the first four digits of which describe the industry in which the product is "primary" and the fifth digit is the product class. The 5-digit product class represents an intermediate grouping of products between the approximately 10,000 7-digit product codes and the 422 4-digit industry code classifications. There are 1,200 5-digit product classes described in the 1967 Census of Manufactures of which 254 were sampled for this survey. Of these, useable responses were received from plants in 223 product classes and are shown in this report.

Abbreviated product class tables are presented in the individual reports to meet publication requirements. More complete titles are contained in Table I, Product Classes Included in This Report. For a more detailed description of the individual products (7-digit) included in each of the 5-digit product classes, the reader can refer to the 1967 Census of Manufactures, Volume II, Industry Statistics.

Note: Totals may not add to 100% due to rounding.

TABLE I: PRODUCT CLASSES INCLUDED IN THIS REPORT

Code	<u>Description</u>
	Soft Drinks
20860	Bottled and canned soft drinks
	TEXTILE MILL PRODUCTS
00561	Knitting Mill Products
22561	Warp knit fabrics, include greige or finished
22562	fabrics Circular knit fabrics, include greige or
22302	finished fabrics
	Other Textile Goods
22720	Tufted carpets and rugs
22952	Vinyl coated fabrics
	WOOD PRODUCTS AND FURNITURE AND FIXTURES
	Veneer and Plywood
24323	Softwood plywood, exterior type
24324	Nonwood-face plywood and other plywood type
	products
24326	Softwood veneer
05001	Office Furniture
25221	Metal office seating, etc.
25222	Metal office desks
25223	Metal office cabinets and cases
25312	Public-Building, Restaurant and Other Furniture Public-building and related furniture
23312	Partitions, Shelving, Lockers, and Office and
	Store Fixtures (Metal or Wood)
25420	Metal partitions, etc. and office and store
	fixtures
	PULP, PAPER, PAPERBOARD, AND PAPER AND BOARD PRODUCTS
	Paper and Board Mills
26213	Coated printing and converting paper
26217	Unbleached kraft packaging and industrial
	converting paper
07/10	Paper and Board Products
26413	Gummed paper and board products
26414 26415	Pressure sensitive tape and labels (unprinted)
26431	Wrappers, laminated or coated Paper grocers' and variety bags, wardrobe,
20431	shopping bags
26432	Specialty bags and liners, made of paper, foil,
	and plastic
26452	Pasted, lined, laminated, or surface-coated
	paperboard

Code	Description
26472	Sanitary tissue health products
26530	Corrugated and solid fiber boxes
26543	Miscellaneous sanitary food containers, boards
	and trays
	PUBLISHING, PRINTING, AND RELATED INDUSTRIES
0.70.01	Book and Pamphlet Printing or Printing and Binding
27321	Book and pamphlet printing and book binding
27222	(lithographic process)
27322	Book and pamphlet printing and book binding
	(other processes)
27521	Lithographic Process (Commercial Printing) Magazine and periodical, lithographic, printing
2/321	only
27522	Label (excluding cloth) and wrapper printing,
_,,,	lithographic
27523	Catalogs and directories printing, lithographic
27524	Financial and legal printing, lithographic
27525	Advertising printing, lithographic
27526	Other commercial lithographic printing
	Manifold Business Forms
27611	Manifold business forms (continuous)
27612	Manifold business forms, unit-set
	Blankbooks, Loose-Leaf Binders and Services for the
	Printing Trade
27891	Edition, library, and other hard-cover book-binding
27910	Typesetting and typographic work
	CHEMICALS AND ALLIED PRODUCTS
	Industrial Inorganic Chemicals
28151	Cyclic (coal tar) intermediates
28152	Synthetic organic dyes (cyclic dyes)
28182	Miscellaneous acyclic chemicals and chemical products
28191	Synthetic ammonia, nitric acid and ammonium
	compounds
	Plastics Materials
28213	Thermoplastic resins (excluding resins for
	protective coverings)
	Synthetic Fibers
28242	Miscellaneous noncellulosic synthetic organic fibers
	Medicinal Chemicals
28331	Synthetic organic medicinal chemicals, in bulk

<u>Code</u>	Description
	Pharmaceutical Preparations for Human Use
28342	Pharmaceutical preparations acting on the
	central nervous system and the sense organs
28345	Pharmaceutical preparations acting on digestive
	system
28346	Pharmaceutical preparations acting on the skin
28347	Vitamin, nutrient, and hematinic preparations
	Soap, Glycerine, Cleaning, Polishing and Related
28423	Products Specialty alconing and semitation products
20423	Specialty cleaning and sanitation products Cosmetics and Toilet Preparations
28442	Perfumes, toilet water, and colognes
28445	Miscellaneous cosmetics and toilet preparations
20115	Fertilizers, Agricultural Chemicals and Miscellaneous
	Chemical Products
28790	Insecticidal and fungicidal preparations
	(formulations) primarily for agricultural use
28993	Miscellaneous chemicals and chemical preparations
	DEED OF THE AND COAL DECEMBER
	PETROLEUM AND COAL PRODUCTS Petroleum Products
29116	Liquefied refinery gases (feed stock and other uses)
29510	Asphalt and tar paving mixtures and blocks, not
29310	made in refineries
	made in relinered
	MISCELLANEOUS PLASTICS PRODUCTS
30792	Foamed plastics products
30794	Packaging and shipping containers (plastic)
30795	Industrial plastics products
30796	Construction plastics products
	OT LOG DROPHOTO AND ACTIVITY AT ANOTHER
	GLASS PRODUCTS AND MINERAL WOOL
	Glass and Glass Products Made from Glass Produced
32210	in This Plant Glass containers
32291	Table, kitchen, art and novelty glassware
32293	Glass fiber - textile type fiber
32273	Mineral Wool
32962	Mineral wool for industrial and equipment insulation
	PRIMARY METAL INDUSTRIES
	Foundry Products
33212	Cast iron pressure pipe and fittings
33214	Miscellaneous gray iron castings
33220	Malleable iron castings
33231	Steel investment castings (all grades)
33232	Miscellaneous carbon steel castings

Code	<u>Description</u>
33233	Miscellaneous alloy steel castings
	Rollers and Drawers of Nonferrous Metals
33512	Rolled, drawn and extruded copper and copper-base allow mill products
33522	Aluminum plate and sheet (including foil stock)
33525	Extruded aluminum rod, bar, and other extruded
00323	shapes, except tube
	Wire and Wire Products Made in Wire Drawing or
	Insulating Establishments
33572	Copper and copper-base alloy wire, for electrical
	transmission
3.3574	Communication wire and cable
33577	Magnet wire
33578	Power wire and cable
	Aluminum Castings and Forge Shop Products
33610	Aluminum and aluminum-base alloy castings
33911	Drop, upset and press steel forgings (closed die)
33920	Nonferrous forgings
	Miscellaneous Primary Metal Products Not Made in
	Steel Mills
33991	Metal powders and paste
33996	Heat treating of metal for the trade
	FABRICATED METAL PRODUCTS, EXCEPT ORDNANCE, MACHINERY
	AND TRANSPORTATION EQUIPMENT
	Cutlery and Hand Tools
34211	Cutlery, scissors, shears, trimmers and snips,
	except power
34231	Mechanics' hand service tools
34233	Files, rasps and file accessories and other hand tools
34411	Fabricated Structural Metal Products, Including Doors Fabricated structural iron and steel for buildings
34413	Miscellaneous fabricated structural iron and steel
34413	Boiler Shop and Sheet Metal Products
34431	Heat exchangers and steam condensers
34432	Fabricated steel plate (including stacks and
	weldments)
34442	Culverts, flumes, irrigation pipes
	Miscellaneous Fabricated Metal Work
34460	Architectural and ornamental metal work
34492	Prefabricated and portable metal buildings and
	parts

Code	Description
	Screw Machine Products, Metal Stamping, Coating and Engraving
34510	Screw machine products
34612	Job stampings (except automotive)
34614	Stamped & spun aluminum cooking & kitchen utensils
34616	Metal commercial and home canning closures
34618	Miscellaneous tamped and pressed metal end products
34710	Electroplating, plating and polishing
34790	Coating, engraving, and allied services
34790	Miscellaneous Fabricated Metal Products
34941	Automatic regulating and control valves
34942	Valves for power transfer (pneumatic and hydraulic)
34943	Other metal valves for piping systems and equipment
34945	Metal fittings, flanges and unions for piping systems
34946	Fittings and assemblies for tubing and hose
34970	Metal foil and leaf (except plain aluminum foil
3.7570	and foil in lamination)
34980	Fabricated pipe and fittings (cut, threaded, etc.)
31700	rabilitation pipe and rivers, court,

CLASS OF PRODUCTS COVERED BY THIS REPORT: (See CODE in a	ddress box above; refer to description in Reference Manual)
GENERA	L INSTRUCTIONS
Please complete this form for the establishment identified above. The information requested refers to the locational and operational characteristics of this establishment during 1970. Note that no actual data totals are requested on this	form. All that is necessary to complete each inquiry is to provide an estimate or rating that most appropriately describes the element or characteristic being studied.
Part A – PLANT LOCA	TION AND CHARACTERISTICS
Item 1 - Date Plant Constructed	
Indicate when this plant was constructed (or underwent MAJO or renovation) (Mork ONE box only)	R addition, expansion,
0101 🔲 1960 — 1967	
0102 1950 - 1959	
o103 Prior to 1950	
0109 CENSUS USE ONLY	
Item 2 - Population of City or Place in which Plant is Located (Mork (ONE box only)
0201 50,000 or more — Skip to Item 4	
o2o2 Less than 50,000 — Go to Item 3	
Item 3 — Distance of Plant fram city or place with 50,000 or more popu	slation (Mork ONE box only)
0203 Less than 50 miles	,
0204 50 miles or more	
0209 CENSUS USE ONLY	
Item 4 — Site Characteristics a. Is this plant located in an industrial park?	the plate of the second of the
oso1 Yes	
0302 No	
0309 CENSUS USE ONLY	
333 🗀	
b. What is the approximate size of the site (total land area, in outside storage, etc.) occupied by this plant? (Mork ONE b	ncluding physical facilities, parking, box only)
0311 Less than one acre	0315 🔲 51 — 100 acres
0312	0316 Over 100 acres
0313 5 20 acres	0319 CENSUS USE ONLY
0314 21 - 50 acres	
c. What is the approximate size, in square feet, of occupiable plant? (Mork ONE box only)	e floor space (under raof) of this
Square feet	Square feet
0321 Less than 10,000	0326 300,000 — 399,999
0322	0327 _ 400,000 - 499,999
0323	0328 500,000 or more
0324	0329 CENSUS USE ONLY
0325 200,000 - 299,999	
PLEASE CONTI	NUE ON REVERSE SIDE

Port B - PRODUCT AND MATERIAL DELIVERIES; WATER USE; HOURLY WAGE RATES DURING 1970										
Item 5 — Principal Types of Materials Used										
Haw wauld yau classify the materials cansumed in the manufacturing aperation of this plant? (Mork ONE box only)										
0401 Principally raw materials, including first stage processing (e.g., debarked logs, graded vegetables, etc.)										
0402										
0403 Approximately equal proportions of raw a	and pro	cessed	material	s.						
0409 CENSUS USE ONLY										
Item 6 — Delivery Schedules and Methads of Transportation										
	STRUC									
There are listed below five categories of time schedules and four methods of transportation generally used in shipping manufactured products and in receiving materials from suppliers. Please select and "rate" the three time schedules and the three transportation methods which, in your judgment, accounted for the portation methods which, in your judgment, accounted for the during 1970.										
Codes for rating items 6a and 6b below:										
1 - Largest tonnage 2 - 5econd			_			largest tonna				
Note: If fewer than three modes of transportation are used or if use rating codes I and/or 2, as appropriate.	fewer	than th	ree of the	spec	ified delivery	time schedul	es appl	у,		
			(E	nter ap	propriate code	(s) 1, 2, and 3	from ab	ove)
